Github: https://github.com/Trouble001/

Objective
Self-taught and passionate Full-Stack Developer with hands-on experience in building real-world web applications using React, Django, and MySQL. Eager to apply problem-solving and development skills in a growth-oriented tech company.

Skills
Programming Languages: C, C++, JavaScript, Python
Frontend: HTML, CSS
Frameworks & Libraries: React, Django, Tailwind, Bootstrap, Material Design
Database: MySQL
Tools: Git, Github, VS Code
Others: Responsive UI, State Management, REST API

Projects
Student Management System (C++)
- Created a Student Management System console program using C++ and local files.
- Where we can add student, get students or get student by roll number, update or delete student.

Weather App (React)
- Developed a responsive weather forecast application using React, Tailwind and OpenWeatherMap API.
- Displayed live weather conditions, temperature, and other stats based on current user location or input.

User Authentication System (React + Django + JWT)
- Created a full-featured authentication app using Django (backend) and React (frontend).
- Features: User registration, login, logout, JWT-based authentication, password reset functionality, and protected routes for authenticated user.
- Employed secure API communication and managed auth token effectively.

Professional Experience
Computer Teacher – Hitech Computer Institute
- Tech programming and computer fundamentals to students.
- Guide Learners in practical labs to create real-world projects.
- Gained strong communication and leadership skills through mentoring students.

Education
Diploma in Electronics and Telecommunications

Additional Info
- Open to remote and onsite opportunities
- Enthusiastic about continuous learning and contributing to real-world tech products
- Strong self-motivation and ability to work independently or in a team
